Student Management System Mini Project Report

Name: Vaishnavi PM
USN: 1RUA25BCA0114

Objective

Develop a Student Management System using Python Tkinter connected to a MySQL database supporting CRUD operations.

Technologies

Python, Tkinter, MySQL, mysql.connector, MySQL Workbench

Database Design

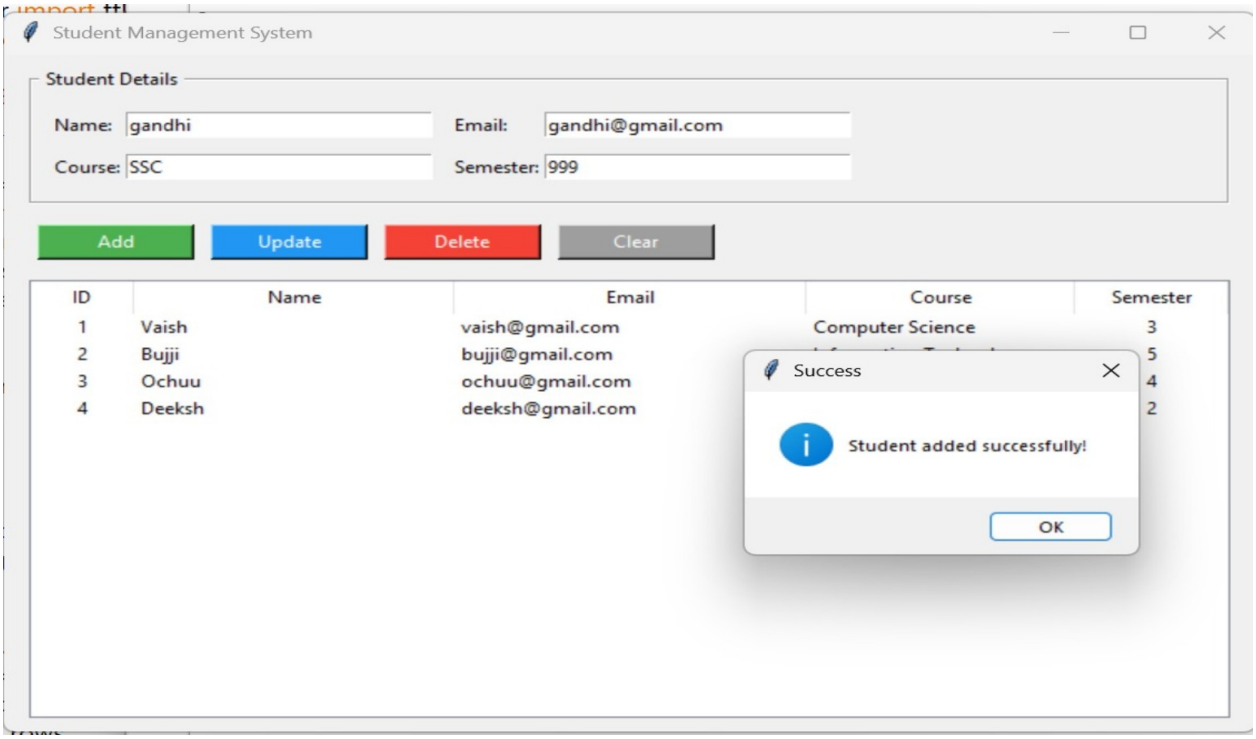

Database: MINIPROJECT
Table: students(student_id PK AUTO_INCREMENT, name, email UNIQUE, course, semester).

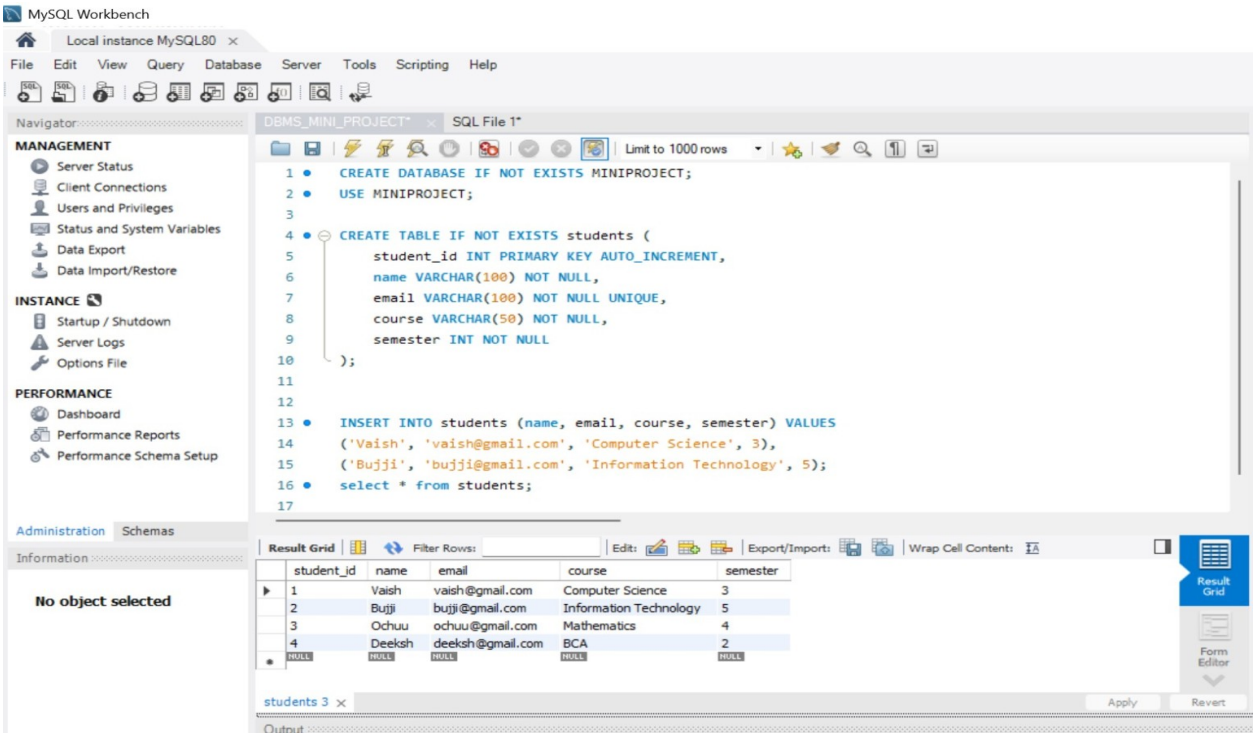

Features

Add, View, Update, Delete student records with validation and MySQL connectivity.

Execution

1. Connect to MySQL.
2. Enter student details.
3. Perform Add/Update/Delete.
4. Records are displayed using SELECT in the table.

Conclusion

The project successfully demonstrates a working Python application connected to a MySQL database implementing CRUD operations.
